

# Engineering Support

*ACCO Engineered Systems is an employee owned contractor with expertise in the areas of heating, ventilating, air conditioning, refrigeration, process piping, plumbing, industrial construction, building control systems, as well as service retrofit and maintenance.*

*ACCO is a fully integrated company with complete in-house engineering, fabrication, installation, commissioning and service capabilities. This integrated delivery system allows ACCO to provide its customers with the most practical, cost effective solutions for their particular mechanical and control system requirements.*

## Engineering is the foundation of outstanding mechanical systems.

Unlike most of our competition, ACCO Engineered Systems is a true design/build contractor. With a dedicated engineering staff of more than 80 persons, including more than 60 professional engineers, ACCO boasts one of the most experienced engineering departments in our industry located throughout our branch network. What this means to you is a single point of contact and responsibility for an engineered solution.

Engineering is the foundation of outstanding mechanical systems. The challenge is to transform innovative ideas into practical and reliable systems.

ACCO leads with the right concepts to meet your needs, and brings the advantage of system fabrication and installation know-how to capitalize on the best means and methods for cost effective results.

We focus beyond the initial installation to ensure that your system is designed to last and function reliably for many years under varying conditions and requirements. Our engineers utilize the experience of our commissioning and service professionals to design systems that will be serviceable and perform efficiently for the long term.

### Below is a brief list of the services we provide:

- ▶ 3-D Modeling and Design Coordination
- ▶ Preconstruction Services and Planning
- ▶ Energy Conservation
- ▶ Systems Evaluation/Comparison and Economic Analysis
- ▶ Code Compliance or Variances
- ▶ LEED Certification
- ▶ Retrofits & Upgrades
- ▶ Applications Engineering

*We look forward to each new assignment and the opportunity to share the experience and knowledge we have gained over more than 80 years in the industry.*
